Stages of Software Development

- Scope
- Requirements
- Design
- Programming
- Testing
- Pilot
- Release

Scope

- Identification of case types
- Differentiation of Limited and General Jurisdiction
- Need for excluded time
- Specific Reports
  - Time to Disposition
  - Age of Active Pending Caseload
  - Summary
  - Detail

Requirements

- Requirements documents created based on the outcome of the committee.
- Finalization of documents following recommendations to AJC.
- Finalized documents will be shared with all non-ACAP CMS developers.

Requirements

- Working with others to identify potential issues and get clarity from the subgroups at the policy level.
- Next step to hold court user group meetings to discuss format and function.

AOC Supported GJ Plan

- AJACS CourTools reports already exist
- Modifications and fixes
- Focus on Time to Disposition and Age of Pending Caseload (measures 3 and 4) related to the case processing time standards
- Demonstration of the CourTools Reports

AOC Supported LJ Plan

- Limited Jurisdiction Courts are on the cusp of a transition from AZTEC to a New CMS.
- Does not make sense to build reports into the CMS
- Utilize Consolidated Case Index (CCI)

CCI

- Conceptually replaces the data warehouse
- Increased intelligence
- More frequent updates
- Centralized reporting using data fed into the CCI from the Limited Jurisdiction Courts

Next Steps

- User groups
  - Verify requirements
  - Identify design elements
  - One for Limited Jurisdiction Courts
  - One for General Jurisdiction Courts
- Recommendations for User Group Participants
